

Fitting Up (Speed) Bolts

Description:

OCM Fitting Up (Speed) Bolts are used for securing steel form panels together. The tapered nose of the bolt acts as a draft pin and helps align the forms. The thread design and clearances between the nut and bolt permits quick assembly and dismantling of the forms. The open thread design permits concrete to be easily knocked out of the threads.

Features:

- Available in several different lengths
- Custom lengths are available
- Heat Treated for extended durability
- 2" size is full threaded for added versatility

Additional Notes: SWL provides a safety factor of approximately 2 to 1.

Item Number	D Size (in)	AC Across Flats (in)	L Length (in)	Thread Length (in)	Grade	Weight Per Piece (lbs)	Carton Quantity
