

Metal Form Patches

Description:

OCM, Inc's Metal Form Patches are used for covering tie holes and defects in form plywood for a smooth finish. The Metal Form Patches have sharp spikes that makes it easy to nail to plywood. Made from 26 gauge galvanized steel to ensure strength and durability.

Features:

- For covering holes and defects in form plywood for a smooth finish.
- Sharp spikes make them easy to nail to plywood.

Additional Notes: SWL provides a safety factor of approximately 2 to 1. Special lengths and Stainless Steel also available.
